

Historic Brick Campaign

Be a part of Edgewood's past, present and future. Have your name engraved on an historic pump house (circa 1900) brick to become a part of Edgewood Children's Center's future. The Pump House, with its 8'x14' cistern was constructed on the grounds of Edgewood Children's Center around the turn of the century. Now bricks from that building are being used to create a beautiful entry plaza to the historic (1852) Rock House.

Etch your name, the name of someone you wish to honor or memorialize, or your company name, through a personalized Pump House brick. Your commemorative brick will become a lasting tribute for you and your friends and family.

You will be creating a permanent legacy that will be seen and appreciated by generations of children and families in the years to come while paving the way for a better future for children in our community.
